Application-specific safe message handlers (ASHs) are designed to provide applications with hardware-level written code fragments that safely and efficiently execute in the kernel in response to message arrival. *ASHs* eliminate copies) and send messages (thereby reducing send-response latency). In addition, the *ASH* is integrated layer processing (thereby eliminating duplicate message ...

Issue 2
Full text available:  [pdf\(1.57 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

We propose a new framework for resource allocation based on concepts from microeconomics. Specifically, managing resources in a multiple-query environment composed of queries with widely varying resource requirements. The framework is a resource broker that realizes a profit by "selling" resources to competing operators using a guiding principle for brokering resources is profit maximization. In other words, the goal is to maximize the total profit of the system.

150 Compiler transformations for high-performance computing
David F. Bacon, Susan L. Graham, Oliver J. Sharp
December 1994 **ACM Computing Surveys (CSUR)**, Volume 26 Issue 4
Full text available:  [pdf\(6.32 MB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

In the last three decades a large number of compiler transformations for optimizing programs have been developed. These transformations reduce the number of instructions executed by the program using transformations based on data-flow techniques. In contrast, optimizations for high-performance superscalar, vector, and parallel processors rely on memory locality with transformations that rely on tracking the properties of the program's execution.

121 Shock resistant Time Warp

Alois Ferscha, James Johnson

May 1999

Proceedings of the thirteenth workshop on Parallel and distributed simulation

Full text available: pdf(904.99 KB) [Publisher Site](#)

Additional Information: full citation, abstract, references, index term

In an attempt to cope with time-varying workload, traditional adaptive Time Warp protocols are designed to adapt to changes by altering control parameter configurations, like the amount of available memory, the size of the GVT computation, fossil collection invocations, etc. We call those schemes "reactive" because all control parameters are determined by historical performance information collected at runtime, and come into effect immediately.

122 Flexible control of downloaded executable content

Trent Jaeger, Atul Prakash, Jochen Liedtke, Nayeem Islam

May 1999

ACM Transactions on Information and System Security (TISSEC), Volume 2 Issue 2

Full text available: pdf(297.79 KB)

Additional Information: full citation, abstract, references, citings, in

We present a security architecture that enables system and application access control requirements to be enforced on downloaded executable content. Downloaded executable content consists of messages downloaded from a remote principal, run, upon receipt, on the downloading principal's machine. Unless restricted, this content can perform many actions, including accessing the downloading principal's private data and sending messages on the principal's behalf.

Keywords: access control models, authentication, authorization mechanisms, collaborative systems, role

124 Broadcast protocols to support efficient retrieval from databases by mobile users

Anindya Datta, Debra E. VanderMeer, Aslihan Celik, Vijay Kumar

March 1999

ACM Transactions on Database Systems (TODS), Volume 24 Issue 1

Full text available: pdf(638.48 KB)

Additional Information: full citation, abstract, references, citings, in

Mobile computing has the potential for managing information globally. Data management issues in mobile computing in recent times, and the design of adaptive broadcast protocols has been posed as an important problem for servers to decide on the content of broadcasts dynamically, in response to client mobility and demand. This paper presents protocols and also propose efficient retrieval schemes.

Keywords: adaptive broadcast protocols, client-server computing, energy conservation, mobile databas

125 Job scheduling in the presence of multiple resource requirements

131 System-level power estimation and optimization

Luca Benini, Robin Hodgson, Polly Siegel

August 1998

Proceedings of the 1998 international symposium on Low power electronics and

Full text available: pdf(878.71 KB)

Additional Information: full citation, abstract, references, citings, in

Most work to date on power reduction has focused at the component level, not at the system level. In this paper, we describe a new approach to describing the power behavior of system-level designs. The model consists of a set of resources, an environment, and a power management policy, which serves as the heart of the system model. We map this model to a simulation and use it to estimate the system's power dissipation. Accompanying this paper is a CD-ROM containing the source code for the model and the simulation.

132 Experiences with network-based user agents for mobile applications

Thomas F. La Porta, Thomas Woo, Krishan K. Sabnani, Ramachandran Ramjee

August 1998

Mobile Networks and Applications, Volume 3 Issue 2

Full text available:  pdf(631.57 KB)

Additional Information: full citation, abstract, references, citings, in

Wireless networks are characterized by simple end devices and limited bandwidth. One solution to address the wireless mobile environment that has been widely pursued is the placement of proxies, or agents, inside the network that would normally take place on end devices. These agents can additionally manipulate data to assist in providing services. The design and implementation of a user agent in a wireless network is discussed in this paper.

133 Efficient and flexible fault tolerance and migration of scientific simulations using CUMULVS

James Arthur Kohl, Philip M. Papadopoulos

140 Exploiting process lifetime distributions for dynamic load balancing

Mor Harchol-Balter, Allen B. Downey

August 1997 **ACM Transactions on Computer Systems (TOCS)**, Volume 15 Issue 3Full text available:  pdf(557.04 KB)

Additional Information: full citation, abstract, references, citings, in

We consider policies for CPU load balancing in networks of workstations. We address the question of whether local execution (moving processes only at the time of birth) is necessary, or whether remote execution (migrating processes only at the time of birth) is necessary, or whether remote execution (migrating processes only at the time of birth) is necessary. That resolving this issue is strongly tied to understanding the process lifetime distribution. Our measurements for a UNIX process is Pareto (heavy-tailed), with ...

115 Design and implementation of a distributed virtual machine for networked computers

Emin Gün Sirer, Robert Grimm, Arthur J. Gregory, Brian N. Bershad

December 1999 **ACM SIGOPS Operating Systems Review , Proceedings of the seventeenth ACM symposium on operating systems principles**, Volume 33 Issue 5

Full text available:  [pdf\(1.62 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [in](#)

This paper describes the motivation, architecture and performance of a distributed virtual machine (DVM) distributed service architecture to meet the manageability, security and uniformity requirements of large computers. In a DVM, system services, such as verification, security enforcement, compilation and optimization are located on powerful network servers. This partitioning of system functions ...

116 Cellular Disco: resource management using virtual clusters on shared-memory multiprocessors

Kinshuk Govil, Dan Teodosiu, Yongqiang Huang, Mendel Rosenblum

December 1999 **ACM SIGOPS Operating Systems Review , Proceedings of the seventeenth ACM symposium on operating systems principles**, Volume 33 Issue 5

Full text available:  [pdf\(1.93 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [in](#)

Despite the fact that large-scale shared-memory multiprocessors have been commercially available for some time, not all their features are still not available, mostly due to the complexity and cost of making the required changes. A recently proposed approach, called Disco, substantially reduces this development cost by using a virtual operating system technology. In this paper we present a system ...

117 The interactive performance of SLIM: a stateless, thin-client architecture

Brian K. Schmidt, Monica S. Lam, J. Duane Northcutt

December 1999 **ACM SIGOPS Operating Systems Review , Proceedings of the seventeenth ACM symposium on operating systems principles**, Volume 33 Issue 5

Full text available:  [pdf\(1.79 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [in](#)

Taking the concept of thin clients to the limit, this paper proposes that desktop machines should just be keyboards, mouse, etc.) that access a shared pool of computational resources over a dedicated interconnect. Building's telephone services are accessed by a collection of handset devices. The stateless desktop design allows users can transparently resume their work on any desktop computer ...

120 Scheduling optimization for resource-intensive Web requests on server clusters

Huican Zhu, Ben Smith, Tao Yang

June 1999 **Proceedings of the eleventh annual ACM symposium on Parallel algorithms and architectures**

Full text available:  [pdf\(1.19 MB\)](#)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

Keywords: integrated programming environments, program editors

105 Client-server computing in mobile environments

Jin Jing, Abdelsalam Sumi Helal, Ahmed Elmagarmid

June 1999

ACM Computing Surveys (CSUR), Volume 31 Issue 2

Full text available:  pdf(233.31 KB)

Additional Information: [fu](#)

Recent advances in wireless data networking and portable information appliances have engendered a ne regardless of their physical location or movement behavior. In the meantime, research addressing inform way ...

Keywords: application adaptation, cache invalidation, caching, client/server, data dissemination, discon

106 Flexible control of downloaded executable content

Trent Jaeger, Atul Prakash, Jochen Liedtke, Nayeem Islam

May 1999

ACM Transactions on Information and System Security (TISSEC), Volume

Full text available:  pdf(297.79 KB)

Additional Information: [fu](#)

We present a security architecture that enables system and application a ccess control requirements to t downloaded from remote hosts that contain executables that run, upon receipt, on the downloading prin and sending messages on th ...

Keywords: access control models, authentication, authorization machanisms, collaborative systems, role

107 Planning and resource allocation for hard real-time, fault-tolerant plan execution

Ella M. Atkins, Tarek F. Abdelzaher, Kang G. Shin, Edmund H. Durfee

April 1999 **Proceedings of the third annual conference on Autonomous Agents**

Full text available:  pdf(1.01 MB) Additional Information: [full citation](#), [references](#), [index terms](#)

108 Summary of the sigmetrics symposium on parallel and distributed processing

Jeffrey K. Hillingsworth, Barton P. Miller

March 1999 **ACM SIGMETRICS Performance Evaluation Review**, Volume 26 Issue 4

Full text available:  pdf(1.17 MB) Additional Information: [full citation](#), [index terms](#)

109 Broadcast protocols to support efficient retrieval from databases by mobile users

Anindya Datta, Debra E. VanderMeer, Aslihan Celik, Vijay Kumar

March 1999

ACM Transactions on Database Systems (TODS), Volume 24 Issue 1

Full text available:  pdf(638.48 KB)

Additional Information: [fu](#)

Mobile computing has the potential for managing information globally. Data management issues in mobi important problem. Such protocols are employed by database servers to decide on the content of bbroa retrieval s ...

Keywords: adaptive broadcast protocols, client-server computing, energy conservation, mobile databas

110 Running EveryWare on the computational grid

Rich Wolski, John Brevik, Chandra Krintz, Graziano Obertelli, Neil Spring, Alan Su

January 1999 **Proceedings of the 1999 ACM/IEEE conference on Supercomputing (CDROM)**

Full text available:  pdf(414.73 KB) Additional Information: [full citation](#), [references](#), [citing](#), [index terms](#)

111 JRes: a resource accounting interface for Java

Grzegorz Czajkowski, Thorsten von Eicken

October 1998

ACM SIGPLAN Notices , Proceedings of the 13th ACM SIGPLAN conferen

Full text available: pdf(2.01 MB)

Additional Information: fu

With the spread of the Internet the computing model on server systems is undergoing several important changes, resulting in designs of extensible databases and Web servers. In addition, both ordinary users and service providers are using XML as the language of choice for exchanging information.

Keywords: Java, extensible systems, resource management

112 Performance counters and state sharing annotations: a unified approach to thread locality

Boris Weissman

October 1998

Proceedings of the eighth international conference on Architectural sup

Full text available: pdf(1.76 MB)

Additional Information: fu

This paper describes a combined approach for improving thread locality that uses the hardware performance monitoring facilities to compute expected thread footprints in the cache on-line. The accuracy of the approach is evaluated by comparing it against a shared state cache model to compute expected thread footprints in the cache on-line. The accuracy of the approach is evaluated by comparing it against a shared state cache model to compute expected thread footprints in the cache on-line. The accuracy of the approach is evaluated by comparing it against a shared state cache model to compute expected thread footprints in the cache on-line.

113 Vclusters: a flexible, fine-grained object clustering mechanism

Mark L. McAuliffe, Michael J. Carey, Marvin H. Solomon

October 1998

ACM SIGPLAN Notices , Proceedings of the 13th ACM SIGPLAN conferen

Full text available:  pdf(2.07 MB)

Additional Information: fu

We consider the problem of delivering an effective fine-grained clustering tool to implementors and users. This paper concentrates on clustering *policies* (deciding which objects should be near each other). Existing on-line clustering tools are particularly ...

114 UFO: a personal global file system based on user-level extensions to the operating system

Albert D. Alexandrov, Maximilian Ibel, Klaus E. Schauser, Chris J. Scheiman

August 1998

ACM Transactions on Computer Systems (TOCS), Volume 16 Issue 3

Full text available: pdf(251.25 KB)

Additional Information: fu

In this article we show how to extend a wide range of functionality of standard operation systems compliance file system provided by many Unix operating systems. The behavior of some intercepted system calls is fact, the ...

Keywords: file caching, global name space, proc file system, user-level operating system extensions

115 Experiences with network-based user agents for mobile applications

Thomas F. La Porta, Thomas Woo, Krishan K. Sabnani, Ramachandran Ramjee

August 1998

Mobile Networks and Applications, Volume 3 Issue 2

Full text available: pdf(631.57 KB)

Additional Information: fu

Wireless networks are characterized by simple end devices and limited bandwidth. One solution to address this is to move some of the processing inside the network to assist with application processing that would normally take place on end devices. The implementation of a user a ...

116 Guidance for the use of the Ada programming language in high integrity systems

B. A. Wichmann

July 1998

ACM SIGAda Ada Letters, Volume XVIII Issue 4

Full text available: pdf(2.93 MB)

Additional Information: fu

This paper is the current result of a study by the ISO HRG Rapporteur group which is being circulated for substantial e-mail comments are: Praful V Bhansali (Boeing, USA), Alan Burns (University of York, UK), I (DGEI/INSA, France), George Roma ...

117 A dynamic view-oriented group communication service

Roberto De Prisco, Alan Fekete, Nancy Lynch, Alex Shvartsman

June 1998 **Proceedings of the seventeenth annual ACM symposium on Principles of distributed**

Full text available:  pdf(3.91 MB)

Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#)

118 Performance evaluation of the Orca shared-object system

Henri E. Bal, Raoul Bhoedjang, Rutger Hofman, Criel Jacobs, Koen Langendoen, Tim Rühl, M. Frans Kaash
February 1998 **ACM Transactions on Computer Systems (TOCS)**, Volume 16 Issue 1

Full text available:  pdf(179.39 KB)

Additional Information: [fu](#)

Orca is a portable, object-based distributed shared memory (DSM) system. This article studies and evaluates coherence protocol (based on write-updates with function shipping), the totally ordered group communication applications ill ...

Keywords: distributed shared memory, parallel processing, portability

119 Adaptive, fine-grained sharing in a client-server OODBMS: a callback-based approach

Markos Zaharioudakis, Michael J. Carey, Michael J. Franklin

December 1997 **ACM Transactions on Database Systems (TODS)**, Volume 22 Issue 4

Full text available:  pdf(441.80 KB)

Additional Information: [fu](#)

For reasons of simplicity and communication efficiency, a number of existing object-oriented database management systems, their efficiency, page servers are often criticized as being too restrictive when it comes to concurrency, as server context. Sev ...

Keywords: cache coherency, cache consistency, client-server database, fine-grained sharing, object-o

120 Fast detection of communication patterns in distributed executions

Thomas Kunz, Michiel F. H. Seuren

November 1997 **Proceedings of the 1997 conference of the Centre for Advanced Studies**

Full text available:  pdf(4.21 MB)

Additional Information: [fu](#)

Understanding distributed applications is a tedious and difficult task. Visualizations based on process-time event tracer developed at the University of Waterloo. However, these diagrams are often very complex and trivial communication ...

126 ASHs: Application-specific handlers for high-performance messaging

Deborah A. Wallach, Dawson R. Engler, M. Frans Kaashoek

August 1996

ACM SIGCOMM Computer Communication Review , Conference proceedi

Full text available:  [pdf\(174.50 KB\)](#)

Additional Information: [fu](#)

Application-specific safe message handlers (ASHs) are designed to provide applications with hardware-le arrival. ASHs can direct message transfers (thereby eliminating copies) and send messages (thereby red duplicate message ...

127 Mariposa: a wide-area distributed database system

Michael Stonebraker, Paul M. Aoki, Witold Litwin, Avi Pfeffer, Adam Sah, Jeff Sidell, Carl Staelin, Andrew Yu

January 1996

The VLDB Journal — The International Journal on Very Large Data Base:

Full text available:  [pdf\(172.75 KB\)](#)

Additional Information: [fu](#)

The requirements of wide-area distributed database systems differ dramatically from those of local-area different access and charging algorithms, install site-specific data type extensions, and have different co normal business h ...

Keywords: Autonomy, Databases, Distributed systems, Economic site, Name service, Wide-area network

128 Informed prefetching and caching

R. H. Patterson, G. A. Gibson, E. Ginting, D. Stodolsky, J. Zelenka

December 1995

ACM SIGOPS Operating Systems Review , Proceedings of the fifteenth ACM sym

Full text available:  [pdf\(2.13 MB\)](#)

Additional Information: [full citation](#), [references](#), [citing](#), [inde](#)

129 A highly available scalable ITV system

M. N. Nelson, M. Linton, S. Owicki

December 1995

ACM SIGOPS Operating Systems Review , Proceedings of the fifteenth ACM sym

Full text available:  [pdf\(1.64 MB\)](#)

Additional Information: [full citation](#), [references](#), [citing](#), [inde](#)

130 Implementing global memory management in a workstation cluster

M. J. Feeley, W. E. Morgan, E. P. Pighin, A. R. Karlin, H. M. Levy, C. A. Thekkath

December 1995

ACM SIGOPS Operating Systems Review , Proceedings of the fifteenth ACM sym

Full text available:  [pdf\(1.52 MB\)](#)

Additional Information: [full citation](#), [references](#), [citing](#), [inde](#)

131 Exokernel: an operating system architecture for application-level resource management

D. R. Engler, M. F. Kaashoek, J. O'Toole

December 1995

ACM SIGOPS Operating Systems Review , Proceedings of the fifteenth ACM sym

Full text available:  [pdf\(2.16 MB\)](#)

Additional Information: [full citation](#), [references](#), [citing](#), [inde](#)

132 A compiler-directed distributed shared memory system

Tzi-cker Chiueh, Manish Verma

July 1995

Proceedings of the 9th international conference on Supercomputing

Full text available:  [pdf\(1.22 MB\)](#)

Additional Information: [full citation](#), [references](#), [citing](#), [index terms](#)

133 Pen computing: a technology overview and a vision

André Meyer

July 1995

ACM SIGCHI Bulletin, Volume 27 Issue 3

Full text available: pdf(5.14 MB)

Additional Information: fu

This work gives an overview of a new technology that is attracting growing interest in public as well as in academia. It explores the interaction between a user and a machine, picking up the familiar pen and paper interface metaphor. For a short historic ...

134 Compiler transformations for high-performance computing

David F. Bacon, Susan L. Graham, Oliver J. Sharp

December 1994

ACM Computing Surveys (CSUR), Volume 26 Issue 4

Full text available:  pdf(6.32 MB)

Additional Information: fu

In the last three decades a large number of compiler transformations for optimizing programs have been based on the analysis of scalar quantities and data-flow techniques. In contrast, optimizations for high-precision tracking the properties of ...

Keywords: compilation, dependence analysis, locality, multiprocessors, optimization, parallelism, super

135 Transparent fault tolerance for distributed Ada applications

Mark A. Breland, Steven A. Rogers, Guillaume P. Brat, Kenneth L. Nelson

November 1994

Proceedings of the conference on TRI-Ada '94

Full text available: pdf(1.62 MB)

Additional Information: fu

The advent of open architectures and initiatives in massively parallel supercomputing, combined with the tolerance. Expanding capabilities of distributed Ada runtime environments further stimulate the incorporation of distribution and virtually ...

136 Sharing and protection in a single-address-space operating system

Jeffrey S. Chase, Henry M. Levy, Michael J. Feeley, Edward D. Lazowska

November 1994

ACM Transactions on Computer Systems (TOCS), Volume 12 Issue 4

Full text available:  pdf(2.87 MB)

Additional Information: fu

This article explores memory sharing and protection support in Opal, a single-address-space operating system. Sharing is simplified, because addresses are context independent. There is no loss of protection, if a thread executes. T ...

Keywords: 64-bit architectures, capability-based systems, microkernel operating systems, object-oriented

137 Cache coherence in large-scale shared-memory multiprocessors: issues and comparisons

David J. Lilja

September 1993 **ACM Computing Surveys (CSUR)**, Volume 25 Issue 3Full text available: pdf(3.12 MB)

Additional Information: full citation, references, citings, index term

138 Compiling nested data-parallel programs for shared-memory multiprocessors

Siddhartha Chatterjee

July 1993 **ACM Transactions on Programming Languages and Systems (TOPLAS)**, Volume 15 Issue 3

Full text available: pdf(4.17 MB)

Additional Information: full citation, references, citings, index terms, review

Keywords: compilers, data parallelism, shared-memory multiprocessors

139 Query evaluation techniques for large databases

Goetz Graefe

June 1993

ACM Computing Surveys (CSUR), Volume 25 Issue 2

Full text available:  pdf(9.37 MB)

Additional Information: fu

Database management systems will continue to manage large data volumes. Thus, efficient algorithms for and extensible database systems will not solve this problem. On the contrary, modern data models exact records, query-processing ...

Keywords: complex query evaluation plans, dynamic query evaluation plans, extensible database systems, query plan matching algorithms, sort-hash duality

140 CHAOSarc: kernel support for multiweight objects, invocations, and atomicity in real-time multipro

Ahmed Gheith, Karsten Schwan

February 1993

ACM Transactions on Computer Systems (TOCS), Volume 11 Issue 1

Full text available:  pdf(2.81 MB)

Additional Information: fu

CHAOSarc is an object-based multiprocessor operating system kernel that provides primitives with which systems, and real-time applications. The CHAOSarc can guarantee desired performance and functionality
